Experience

Associate Software Development Engineer

Restoplus

April 2023 - Present

- Created highly maintainable and reusable components using both functional and class-based react components.
- Effectively translated client requirements to system features and system requirements.
- Utilized GCP products like [Pubsub / Cloud Functions / Firestore/Cloud Tasks/Cloud Run, etc.] for system development and infrastructure needs.
- Integrated a hardware device into the system as part of an R&D project done independently.
- Provided effective troubleshooting/debugging for the system.
- Work closely with the design and QA team to facilitate business needs.
- Consistently adhered to company coding standards and best practices.
- Contributed to a team project integrating third-party APIs for payment processing and external application connections.

Some personal projects

- Created a real-time chat application using React and Firebase.
- Built a full-size vending machine with Arduino.
- Implement REST API with Node, Express, and MongoDB for some of my projects.
- Built a GraphQL server with authentication and authorization for a local service marketplace application.

Education

Naga College Foundation

2019 -2023

Bachelor of Science In Computer Engineering

- Institute of Computer Engineers of the Philippines Student Edition (ICPEP)
